Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2-3,5 and 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 016,302 in view of Harasta et al.

See the appropriate paragraph of the 9/22/06 Office action.

Response to Arguments

Applicant's arguments filed 1/22/07 have been fully considered but they are not persuasive.

Applicants' state EP does not teach the polymer bead particles embedded with the reflective materials, but rather teaches the polymer beads and the reflective particles part of the hydrophilic film layer.

EP teaches all of the claimed elements- the chromogen, the polymer beads, the hydrophilic matrix and the reflective particles. The only difference is that EP teaches the light reflective particles are incorporated into the hydrophilic matrix rather than the beads. The Office maintains all of these elements are in intimate contact with each other in a single layer and one having ordinary skill in the art would have expected similar or identical results from EP. A convincing, proper and timely Declaration that compared the results of the EP device to the claimed device could be helpful to show any potential unexpected results which could possible define over the rejections of record.

Art Unit: 1743

Applicants' traverse the combination of EP and Harasta et al. The Office maintains Harasta et al. teach sufficient motivation of why one having ordinary skill in the art would use the claimed bead diameter range.
